

## FEATURES

- Plugs directly into 120V outlet and provides wireless ON/OFF control of lighting or electrical appliances that are connected to the ZRP110. The controlled outlet also has sense feature that turns it on when load is turned on.
- Each ZRP110 functions as an automatic repeater to other HomePro Modules to ensure reliable control.
- Supports the Powerlevel command
- Has ability to automatically ask Static Update Controller (SUC) for network updates.  
**This product supports 40Kbps data transmission.** This product can also be used for networking support in systems that stream metadata. An example might include transmission of information from audio devices such as song title, artist, and album information to various displays around the home.

## APPLICATIONS

### SAFETY AND SECURITY

- **ALL ON/ALL OFF** - With a ZTH100 Wireless Controller you can turn all connected lights on or off with the touch of one of the six buttons in case you come home late or hear noises outside. If an appliance is connected, the ALL ON/ALL OFF function of those modules can be (individually) disabled.

### COMFORT AND CONVENIENCE

- **Total Remote Control** - Plug-In Exterior Appliance Module allows you to turn on exterior electrical loads regardless of where you are in the home.
- **"Grouping"** activates several, or all, Modules (and their connected loads), by the push of one button on the Wireless Controller. Front and rear exterior lighting could be controlled simultaneously.
- **"Scene"** settings allow connected lighting to turn off and on and in pre-selected patterns. The Wireless Controller can be programmed using the scene function to turn lighting on or off, and with the push of a button on the Wireless Controller.
- **"Timer"** on the Wireless Controller lets you set plug-in Exterior Appliance Module and connected lights to turn on or off at preset times. Great for outside holiday lighting or patio or walkway lighting.
- **"Protection Command"** - Three settings: "No Protection", "Child Protection" and "Button totally disabled".

## PRODUCT DESCRIPTION

Plug-in Appliance Modules can easily be installed by the homeowner. A ZTH100 Wireless Controller provides remote control. Pushing the oval button on the Plug-in Appliance Module identifies it to the Wireless Controller. This button can also turn the connected load on and off manually.

Lamps and other electrical loads can be turned on and off, in groups or individually from the Wireless Controller.

An "All Lights On" command can be broadcast

from the HomePro Wireless Controller for security reasons, and the "Timer" feature, schedules the on and off times of lighting and other electrical loads at pre-selected times.

If controlling lighting, a single button on the Wireless Controller can select predetermined "scene" lighting programmed by the homeowner (ON or OFF with the ZRP110).

HomePro products utilize Z-Wave™ technology to communicate and inter-operate, and are compatible with other Z-Wave™ enabled products.

## ORDERING INFORMATION

---

Specify: **ZRP110** - 120 VAC, 15A, Plug-in Exterior Appliance Module (Black)

## SPECIFICATIONS

---

### Electrical

Power	120 VAC, 60 Hz
Signal (Frequency)	908.42 MHz
Load	Resistive: 15 amps (1800 watts) maximum, 120 VAC Motor: 1/2 H.P. maximum, 120 VAC Incandescent: 600 watt maximum, 120 VAC
Range	Up to 100 feet line of sight between the Wireless Controller and /or the closest HomePro Module

### Mechanical

Dimensions	Approximately. 11.5" L (cord and plug) x 2.4" W x 1.6" D
Weight	Approximately 7.7 oz.

### Environmental

Operating Temperature Range	32-105°F (0-40° C). Outdoor and indoor use
